

# OnHold 4.0

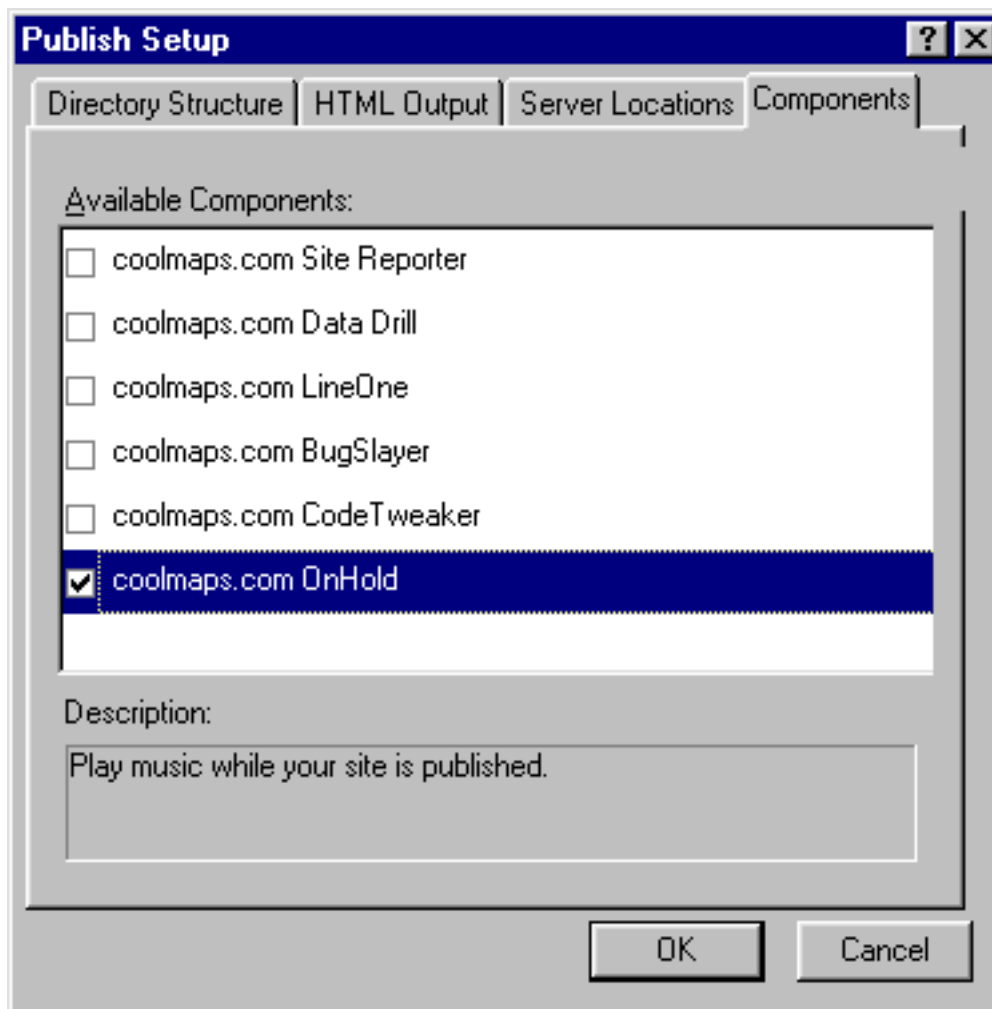

copyright © 1999 coolmaps.com inc

## Getting Started

OnHold is a novelty component that lets you listen to muzak while Fusion publishes your site!

OnHold is a 'post publish' component. It does not appear on the coolmaps.com component bar in Page view. OnHold is enabled in Publish View.

- Choose Publish View > Set Up > Components

## Make some Muzak

Once activated in Publish > Set Up, OnHold will play muzak

while Fusion publishes your site!

OnHold will play any .au file, but:

- it must be located in the components/coolmaps directory
- you must name the file OnHold.au

Enjoy your muzak!
