

# ThumbsUp 5.0

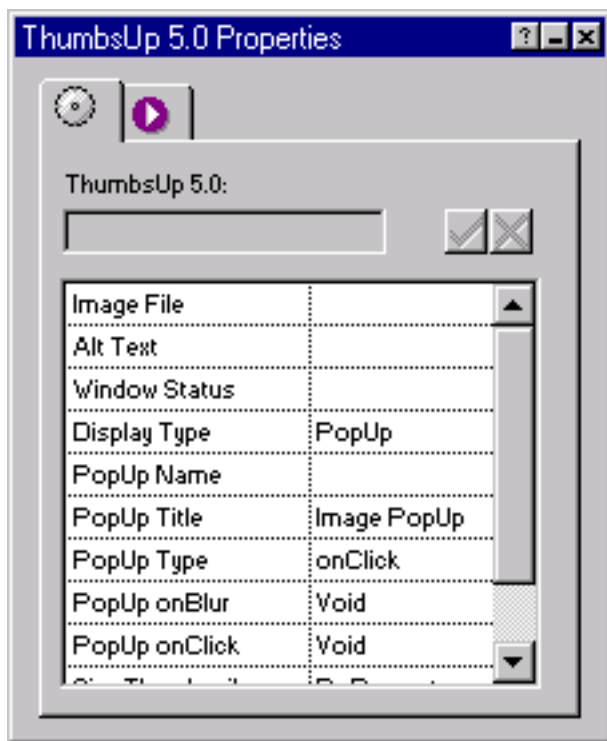

## 👍 Getting Started with ThumbsUp

ThumbsUp allows you to easily create a thumbnail image and have it displayed in either a popup window or as a CoolTip\*.

Getting started with ThumbsUp 5.0 is easy!

- Run the Installation program, specifying the location of Fusion v4.0/5.0's component directory.
- Launch Fusion v4.0/5.0
- If the coolmaps.com component toolbar is not visible choose View > Toolbars > Component Tools > coolmaps basic
- Select the ThumbsUp component and drag it out to an area on the page.

The ThumbsUp Properties now appears in Fusion's properties palette.

\*CoolTip option only available if the [CoolTips](#) component is installed.

## 👍 ThumbsUp Options

Image File

Select an image to be used. After selecting, the image can be resized either by manipulating it with the resize handles or by the Size Thumbnail option, explained below.

#### Custom Thumbnail - No | Yes

Select whether to use a custom thumbnail or not. If set to "Yes", select the custom thumbnail using the Thumbnail Image option in the palette. Note: If you're using a custom thumbnail, the thumbnail will not be resizeable.

#### Alt Text - optional

Enter alternative text for the image.

#### Window Status - optional

Enter text to be displayed in the browser window's status bar when the thumbnail is moused over.

#### Display Type - PopUp | CoolTips

If CoolTips is installed, this option will be visible allowing for a CoolTips style display of the full sized image. If CoolTips is not installed, this option is not present and neither are the CoolTips options detailed below.

#### Display Type - PopUp

- **PopUp Name - optional**  
Provide a name if you wish to have the full sized image open in an existing window of the same name. If a name is entered, no spaces or funny characters allowed. Note: This is not the popup window title. The name you enter here is used only as an internal reference by the browser; the name is completely transparent to site visitors.
- **PopUp Title**  
Enter the title for the popup window. This is the text that will appear in the title bar of the popup window.
- **PopUp Type onClick | onMouseOver**  
Select whether the PopUp will be initialized when the thumbnail is clicked or moused over.

#### PopUp Type - onMouseOver

- **onMouseOff - Close Window | Void**  
Set to Close Window, the PopUp window will automatically close when the user mouses off the thumbnail image. Set to Void, the PopUp window will remain open until it is closed by either the user or one of the two following options.
- **PopUp onBlur - Void | Close Window**  
Select whether or not the popup window will close automatically when it is no longer selected.
- **PopUp onClick - Void | Close Window**  
Select whether or not the popup window will close when it is clicked by the user.

#### Display Type - CoolTips\*

- **Preload Full Size Image? - No | Yes**  
Select whether the full sized image should be downloaded from the server when the page loads or when the thumbnail image is moused over/clicked.

- **PopUp Type - onClick | onMouseOver**

Select whether the full sized image should be displayed when the thumbnail is clicked or moused over.

**Thumbnail Size - By Percentage | By Height | By Width**

Select a method for sizing the thumbnail image. Using one of these three options will insure that the image retain original proportions.

- **Thumbnail Percentage**

Scales the thumbnail to a specific percentage.

- **Thumbnail Height**

Enter the desired height for the thumbnail and the proportionate width will automatically be configured.

- **Thumbnail Width**

Enter the desired width for the thumbnail and the proportionate height will automatically be configured.

New in v5.07 and later!

Use the Custom Positioning option in the properties palette to specify exact coordinate values for the popup window. Set the Left and Top values as desired.

---

\*CoolTips functionality info:

- A CoolTips script object must reside on the current page. If there is already an instance of a CoolTips script object, do not drop another one. If there is not an instance of a CoolTips script object on the page, drop one now.
- The "coolmaps.com Publish Component" must be activated.
- Refer to the [CoolTips tutorial](#) for further help.

If using CoolTips functionality with ThumbsUp, be sure to activate the "coolmaps.com Publish Component."

- Choose Publish View > Publish > Publish Components
- Check 'coolmaps.com Publish Component'
