

TickerTape 5.0

✓ Getting Started

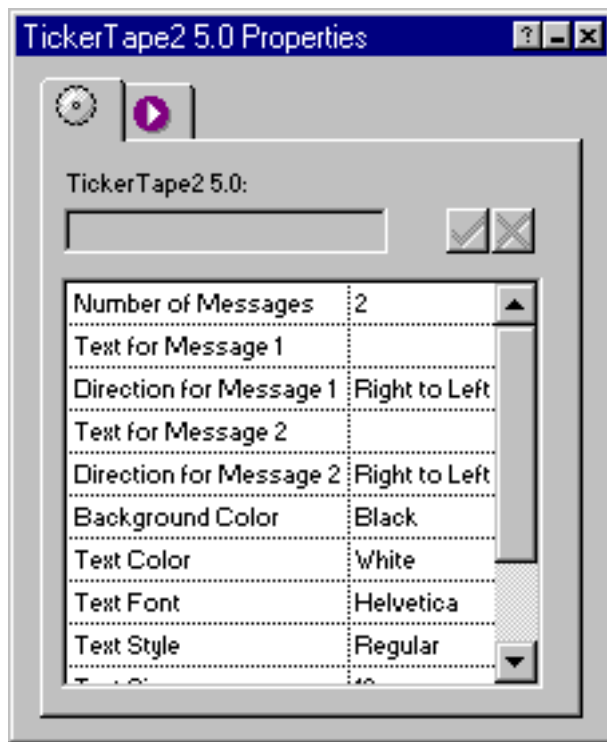

TickerTape 2 replaces and extends the TickerTape component supplied with Fusion 4.0/5.0. It is a java applet configured via the properties palette.

TickerTape 2 allows to choose between 5 directions, applied to a maximum of 20 messages, as well as the standard text font, style, colour and size, and ticker speed.

To get started with TickerTape 2:

- Run the Installation program, specifying the location of Fusion 4.0/5.0's component directory
- Launch Fusion
- If the coolmaps.com component toolbar is not visible choose View > Toolbars > Component Tools > coolmaps.com components
- Select the TickerTape 2 component and drag out an area on the page

The TickerTape properties now appears in Fusion's properties palette.

✓ About the Options
