Coolmaps Basic Components, anything but Basic! Nuts and Bolts of web site development in Fusion made quick and easy.

Confirmer

Fusion v4.0/v5.0 Compatible

Pop-up a message before someone sees a page. Let them cancel and go back to the previous page.

[[detailed info](#)]

DogEar

Fusion v4.0/v5.0 Compatible

DogEar allows you to add 'Print this page', 'Bookmark this page', 'Set as HomePage', 'History Forward/Back buttons, Custom Favorite and URL icons, and disable Right Click/Show Source.

[[detailed info](#)]

EinSteinium

Fusion v4.0/v5.0 Compatible

Do the math. Or don't! let EinSteinium do it for you. Places a basic or scientific calculator right onto your web page. Ideal for placing in a Popup window.

[[detailed info](#)]

FrameSet

Fusion v4.0 & Fusion v5.0 Versions

Protect your site from being pulled into somebody else's FrameSet! Drop FrameSet on the page and your site will always appear in a full browser window.

[[detailed info](#)]

MetaTagger

Fusion v4.0/v5.0 Compatible

MetaTagger looks at each file in the site and creates a unique keywords tag based upon the text found on the page.

[[detailed info](#)]

MouseTrap

Fusion v4.0/v5.0 Compatible

3 Cool DHTML Mouse Trail effects bundled into one component. Custom written for CCC.

[[detailed info](#)]

OClock

Fusion v4.0/v5.0 Compatible

Add a cool digital clock to your page. Graphical numbers makes it look good. Customize it to any time zone.

[[detailed info](#)]

PleaseHold

Fusion v4.0/v5.0 Compatible

Add a customizable, page-loading, pop-up window to any page. Good for sites that are heavy in graphics or text (i.e.

"Please wait while page loads"). When the page is finished loading, the pop-up window disappears.

[[detailed info](#)]

ProtectIt

Fusion v4.0/v5.0 Compatible

Protect one or more pages on your site with one or more passwords. No server-side fussing required.

[[detailed info](#)]

RandomActs

Fusion v4.0/v5.0 Compatible

Display a random image on your page. Set images and associated links. Can also rotate images in a specified order and a specified time interval!

[[detailed info](#)]

RoboText

Fusion v4.0/v5.0 Compatible

Add a text box to your page which flashes through your preset messages. It is the same message TextBox that is featured on the home page of Ask Jeeves.

[[detailed info](#)]

RollOver

Fusion v4.0/v5.0 Compatible

Ultimate RollOver! Options include custom rollovers, status bar messages, alt tags, delays, multiple external targets, and smart highlights.

[[detailed info](#)]

SiteMap

Fusion v4.0/v5.0 Compatible

Automatically generate graphical site maps based on Fusion's Site structure!

[[detailed info](#)]

SlideShow

Fusion v4.0/v5.0 Compatible

SlideShow lets you add a graphic to your page which will change images when another button on the page is clicked.

[[detailed info](#)]

StickUp

Fusion v4.0/v5.0 Compatible

'Sticks' an image to the corner of a web page, making the image visible at all times regardless of how much the page is scrolled.

[[detailed info](#)]

TextTree

Fusion v4.0/v5.0 Compatible

Create site wide flexible navigation in a matter of minutes. Customize the appearance with text, graphics or the FauxGraphic.

[[detailed info](#)]

TickerTape2

Fusion v4.0/v5.0 Compatible

Adds a java tickertape to your page that can be customized with different fonts and colors and directions.

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

Automatically Transform your Browser Page titles into history navigation lists based on Fusion's Site Structure.

[[detailed info](#)]

Coolmaps Advanced Components offer powerful solutions to more complex site development tasks.

BlindDate

Fusion v4.0/v5.0 Compatible

Version 5.10 Re-Release! Completely rebuilt. Place customized dynamic calendars with linked event information on your page.
[[detailed info](#)]

BorderPatrol

Fusion v4.0/v5.0 Compatible

Masterborder flexibility! Display different images on each page within the same Masterborder!
[[detailed info](#)]

CodeTweaker

Fusion v4.0/v5.0 Compatible

CodeTweaker allows you to search and replace the HTML code AFTER Fusion generates it. Do final "tweaking" from totally inside the Fusion environment.
[[detailed info](#)]

DynamicMenu

Fusion v4.0/v5.0 Compatible

DynamicMenu produces a DHTML navigation menu bar at the top of a web page. It's easily configured and looks great!
[[detailed info](#)]

FauxGraphic

Fusion v4.0/v5.0 Compatible

Make custom 'pseudo' graphics from text and tables. Buttons, Banners and more! Create your own styles, or use those supplied.
[[detailed info](#)]

FileAway

Fusion v4.0/v5.0 Compatible

FileAway lets you quickly upload and link to multiple files. Tell FileAway the file types and directories. The component sends those files up to the server and provides links to them on your page.
[[detailed info](#)]

FormValidator

Fusion v4.0/v5.0 Compatible

No more bogus form submissions! Validates email addresses, URL addresses, dates, and other formats. You can choose to not allow blank fields and HTML, and strip HTML.
[[detailed info](#)]

LinkMaster

Fusion v4.0/v5.0 Compatible

Utilize Fusion's site structure and masterborders to create page specific navigation elements. Select either Go-Menu or Text Navigation.
[[detailed info](#)]

MediaPlayer

Fusion v4.0/v5.0 Compatible

Embed the Windows Media Player in your page, controlling all Player Parameters. Easily embed MP3 and other media files.
[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

Win the search engine game by publishing multiple entrances into your site without ever leaving Fusion. Each entrance page gets its own title and meta tags.

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

Advanced handling of Midi and Wav. Create custom graphic control panels to load multiple Midi and/or Wav files into one player that can be visible on the page or not.

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

Schedule site updates to happen automatically while you sleep in! Display images and pages based on time of day or week.

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

Advanced Popup behaviour. Setup a Text or Graphic link to a pop-up window. Also open and close a window on MouseOver and MouseOut.

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

Populate dropdowns automatically with the contents of the text file of your choice. BIG dropdowns? It's all done in a matter of seconds with QuickDrop.

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

Create custom REAL audio and video control areas quickly and easily with RealityBytes! Support for a wide range of REAL objects. Link to local or remote .RA, .RAM and .RPM files.

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

The Ultimate Redirection component! Redirect based on browser, screen resolution, operating system and color depth. Includes AOL, WebTV, Netscape 5 and more!

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

Partner to PopRocket. Ultimate control over popup windows. Add links that change the base page, close the window on blur, and always bring the window to the top when it is selected.

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

Draws from Fusion's site structure to painlessly create a cool, DHTML listing of all the pages in your site.

[[detailed info](#)]

Fusion v4.0/v5.0 Compatible

A Site Search that allows you to parse external URL's from within Fusion. These can then be searched by the site visitor.

[[detailed info](#)]
